PROFESSIONAL STATEMENT

Master's student in Interaction Design and Electronic Arts at the University of Sydney, with a strong foundation in digital product design, UI/UX, and user-centred research. Experienced in developing impactful design outcomes across digital prototypes, physical models, and VR experiences. Also have hands-on experience in AI-driven product management, including market research, product positioning, requirements analysis, interface design, and front-end implementation. Familiar with the full product development lifecycle, cross-functional collaboration, and iterative design. Passionate about building intelligent, user-centred products powered by AI and emerging technologies. Currently seeking internship opportunities in product, interaction, or UX/UI design. Eligible to apply for the Australian Temporary Graduate visa (subclass 485) and intending to apply for the 2-year Post-Higher Education Work stream upon graduation.

EDUCATION

Master of Interaction Design and Electric Arts
The University of Sydney

Feb 2025 - July 2026
Sydney, Australia

Bachelor of Design computing (Design computing)
The University of Sydney

Feb 2022 - Dec 2024
Sydney, Australia

WORK EXPERIENCE

Event Host & Volunteer – ADP Centre

University of Sydney | Feb 2023 – Nov 2023 | Sydney, Australia

- Hosted student events and orientation sessions, welcoming over 100 first-year students.
- Enhanced communication and leadership skills through public speaking and one-on-one interactions.
- Supported new students' transition to university life, strengthening empathy and problem-solving ability.

User Experience Designer & AI Product Manager (Internship)

Hangzhou XinYing Technology Co., Ltd. | December 2025 – Now | Hangzhou, China

- As a user experience designer, my primary responsibility was the iterative development and design of the interface for the AI music product (Songdio) to meet user needs.
- Be responsible for adjusting the design style of the AI music product (Songdio) and designing the web interface.
- As the lead developer of the music therapy product, my responsibilities included preliminary market research, software characterization, summarizing and organizing user needs, interface design, and front-end development.
- As a project assistant, I developed and designed a webpage for matching AI products on both mobile and mobile platforms for the Hangzhou Municipal Government.

Project Assisant

China Railway Construction Corporation Bridge Engineering Group Co.,LTD | October 2025 – December 2025 | Tianjin, China

- Be responsible for the data sorting, analysis and management related work of the marketing department.
- Be responsible for the planning and organization of the weekly business activities of the marketing department
- Assist the department head in completing the compilation of the work report for the first half of the year.

UNIVERSITY PROJECTS

PerioGuard – Smart Toothbrush for Periodontal Health

The University of Sydney | Jul 2024 – Nov 2024

- Led the project planning, task delegation, and iterative design refinement in a group setting.
- Created digital prototypes in **Figma** and physical models with **Fusion 360**.
- Conducted **UX research** and **usability testing** targeting university students.
- Final deliverable: an interactive smart toothbrush combining hardware and app integration.
- Learned user-centered design, stakeholder collaboration, and documentation practices.

SKYDREAER (Future Fly Experience) – Multi Platform Collaboration

The University of Sydney | Feb 2025 – May 2025

- Lead to design a program dedicated to addressing the negative emotional impacts faced by passengers traveling with children during future flights.
- Build a user interface using Figma, which is based on the VR platform architecture and therefore heavily utilizes transparent glass UI components.
- Interface design based on Apple Vision Pro platform.
- The featured feature is to use VR simulation to pre simulate unexpected events encountered during the flight process and eliminate negative emotions.
- Multi platform collaboration dedicated to developing a two-way service platform for parents and children.

Sonair Assistant – Smart And Healthy Living

The University of Sydney | Feb 2025– May 2025

- As a team leader, engage in constructive thinking about the relationship between lung condition and cough.
- The products in Project are divided into UI mobile interface and physical detector (necklace).
- Committed to capturing tiny cough data and visualizing it to help users better understand changes in lung status.
- Effective measures for smokers.

IMPLEMENTATION PROJECTS

Coomo – AI Sound Therapy

Hangzhou XinYing Technology Co., Ltd. | December 2025 | Hangzhou, China

- Led the end-to-end design of an AI-driven music therapy application aimed at improving user focus, relaxation, and emotional well-being through personalized sound experiences.
- Designed the mobile UI interface including modules such as White Noise, Nature Voice, Rhythm, Agile, and Custom sound generation, enabling users to select or create adaptive therapeutic audio.
- Developed intelligent features including Smart Alarm, routine activity creation, and weekly insights to track listening behavior and visualize focus and relaxation trends.
- Implemented voice customization and feedback functions, allowing users to adjust sound characteristics and improve personalization through iterative interaction and user input.
- Focused on creating an immersive, minimalist interface and user-centered interaction flow to enhance accessibility, engagement, and emotional connection.

Songdio – Iteration And Updates Of Ai-Generated Music Software

Hangzhou XinYing Technology Co., Ltd. | January 2025 | Hangzhou, China

- Led the iterative redesign of Songdio, an AI-powered multi-modal music creation platform that enables users to generate professional-quality music through generative AI.
- Redesigned the visual system by shifting from a stable, minimal style to a bold, dynamic interface using vibrant colors and expressive visual elements to enhance engagement and brand identity.
- Designed responsive web interfaces to ensure consistent user experience across desktop and mobile platforms.
- Improved user interaction flow to support the full creative process, including music generation, audio editing, and personalized content creation.
- Focused on aligning visual design, usability, and product goals to strengthen Songdio's positioning as an accessible personal AI music assistant.

HONORS AND AWARDS

SUEDE Design Competition

The University of Sydney | May 2023 – Jul 2023

- Designed a logo combining bird and high-heeled shoe to symbolize women's freedom and equality.
- Applied core graphic design principles in a competitive branding context.
- Enhanced visual storytelling skills and creative expression.
- Won the third prize.

TECHNICAL SKILLS

Software skills: Python, JavaScript, HTML, CSS, Excel, Blender, Rhino, Fusion360, Figma,

Adobe Creative Suite, Canva, Unity, Xcode, Swift

Language: English, Chinese
